EXPERIENCE

- **Spring Computing Technologies Pvt Ltd**   Pune
  Software Engineer(Full-time)   *April 2022 - Present*
  - **Vehicle Detection and Classification(VDC)** :
  - This project uses WebRTC on server side and captures vehicle data in image and video format like license plate number.
  - As a frontend developer I developed responsive UI in accordance with UX designs.
  - API integration performed using axios library to fetch and send data.
  - Used react redux for global state management like in case of user authentication.
  - Sanity testing on live setup also been done before actual build sent to QA team.
  - Also attention given to writing clean code and improved code re-usability in order to improve scalability of project.

- **SmartGig Technologies Pvt Ltd**   Tirupati
  Software Consultant   *Sept 2021 - April 2022*
  - **TalentGig Project** :
  - It aimed to provide short length educational video tutorials especially for programming community.
  - Developed responsive UI of TalentGig website using ReactJS, Bootstrap and Sass in accordance with UI/UX designs.

- **Freelancing for UK client**   Remote
  Frontend developer   *June 2021 - Sept 2021*
  - **Bridging365** :
  - This project aims to provide bridging loans and showcases their services,accept forms for loans
  - As a frontend developer I developed this website from scratch using ReactJS and made it fully responsive.
  - Also coordinated with ux team and backend team in order to achieve best possible outcomes.
